

DOW CORNING

Subject: REACH Annex XVII

Dear Customer:

Concerning the presence of substances listed in REACH Annex XVII (1907/2006 /EC and amendment 552/2009/EC) in Dow Corning products*, we advise as follows,

Where Dow Corning has identified the presence of substances listed in Annex XVII at or above their reporting threshold, these will be clearly identified in section 3 of the product's European Material Safety Data Sheet. Customers are strongly advised to consider this section of the document to determine any resulting impact on their end use application. European Format Safety datasheet, if available, can be obtained from www.dowcorning.com or www.xiameter.com.

Where such presence is not indicated in the product's European Material Safety Data Sheet, we are unaware of any potential sources for the introduction of any REACH Annex XVII substances from the manufacturing and packaging processes utilized, nor from the packaging components themselves. However, Dow Corning does not specifically analyze for the presence of these substances.

Please note that it is generally the responsibility of the customer/end-user to confirm compliance of Dow Corning products with the end use related restrictions in Annex XVII.

Sincerely,

Dow Corning Corporation (for itself and on behalf of its subsidiaries)

*Our products include Dow Corning®, Xiameter®, Syl-off®, Sylgard®, Silastic®, Molykote®, Dow Corning Toray®, and Multibase® brands commercially available at the date of this letter
