Importation into the EU/EEA

Prepared for **REACH**

DOW CORNING

We help you invent the future.™

Who registers imported substances originating from Dow Corning products?

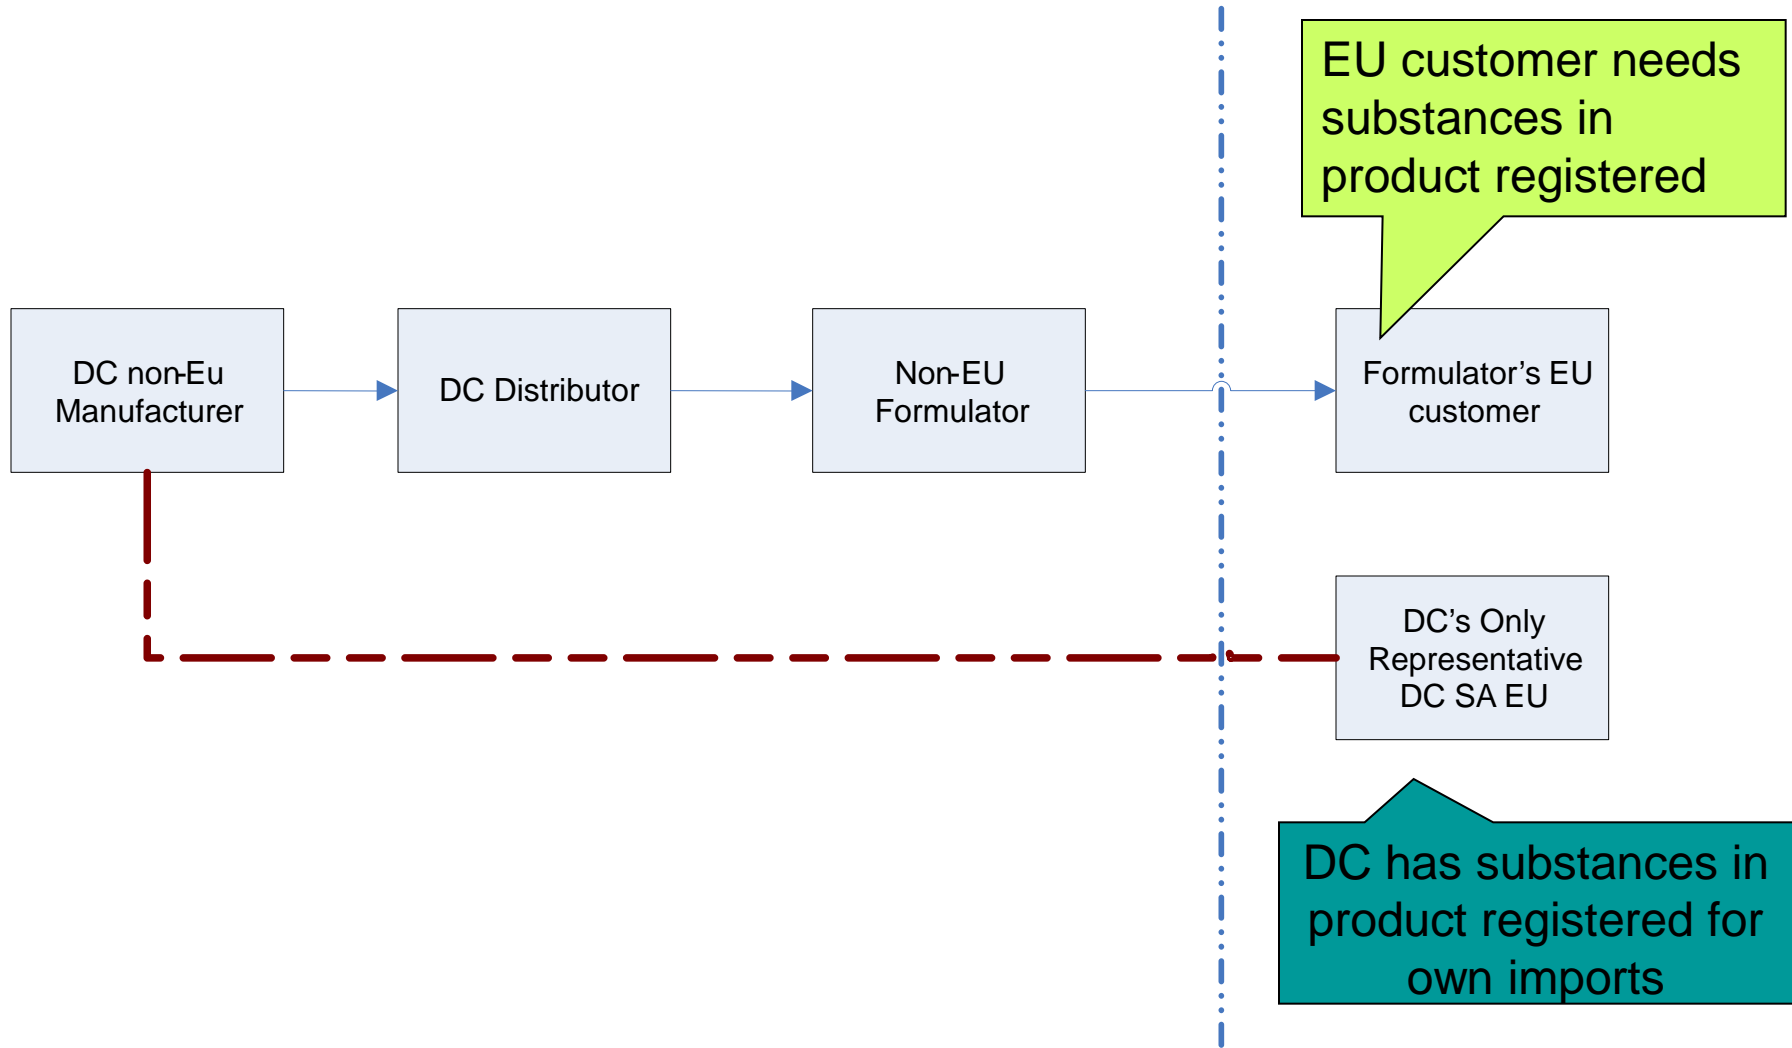

Dow Corning assumes responsibility for registration when:

- Customer purchases from a Dow Corning EU/EEA legal entity
- Dow Corning imports to EU/EEA customer through direct or multi-tier orders
- Dow Corning has agreed to cover substances in our products contained in customer imports:
 1. Dow Corning non EU legal entity can appoint Dow Corning EU SA as their Only Representative
 2. Dow Corning EU SA can then cover all the uses of the downstream users in their registration
 3. Is managed by contacting the regional EHS coordinator through [Dow Corning REACH Resource Center](#)

The Only Representative Trustee (ORT) Role

- For registration, the Only Representative (Dow Corning SA EU) must inform ECHA in the registration dossier of the names of the individual importers (our customer's customers) and the quantity of the substance they import.
- Exporters would be required to disclose up the supply chain to Dow Corning this potentially commercially sensitive information
- If its competitors are involved in the supply chain, Dow Corning should not have access to such commercially sensitive information under competition/anti-trust law
- To avoid transmission of such information up the supply chain a Trustee (Chemservice) is appointed to receive and store importer names and quantities and co-operate on behalf of the DC OR with Competent Authorities as required.
- Using Chemservice (ORT) means that Dow Corning will not need to see the commercially sensitive information of our importers

Typical Import Supply Chain

ORT Model for distributors

DOW CORNING

We help you invent the future.™

Options for distributors

Full code model

- 1) Distributor completes OR request form in their name.
- 2) Dow Corning request code certificate from Chemservice for distributor.
- 3) Dow Corning send certificate to distributor.
- 4) Distributor requests code certificate from Chemservice for their customer.
- 5) Distributor send certificate to their customer.
- 6) Customer request import certificates.

Only the trustee knows the names of the distributor's customers.

Chemservice can prove the full supply chain to competent authorities.

Distributor model

- 1) Distributor completes OR request form listing their and their customer's details.
- 2) Dow Corning request code certificate from Chemservice for distributor's customer.
- 3) Dow Corning send certificate to distributor.
- 4) Distributor send certificate to their customer.
- 5) Customer request import certificates.

Distributor does not pay for a code certificate.

One less certificate reduces confusion and risk of breaks in the chain.

Completing the ORT Request form (1)

REACH ORT Request

E-mail Address*:

Email address is address to which further correspondence concerning this request should be sent. This address will not be passed to third parties other than the trustee.

Title

Last Name*:

Name of person to receive correspondence.

Company Information

Company Name*:

Name and location of company procuring from Dow Corning.

Customer Number:

The customer number is required to fulfill our obligation under the legislation to trace the supply chain. This is a seven digit number beginning with a one found on documents from Dow Corning such as sales invoices. If such documents are not available, then your usual Dow Corning sales contact will be able to help. Note that this is not to be confused with any vendor number that you have allocated to Dow Corning. If you are not an immediate customer of Dow Corning, then please ask your supplier to complete this form (see [Process Flow Chart](#)).

First Name:

Last Name:

Company:

Address*:

City*:

This should be the distributor's email address. The code certificate will be sent to this address

This should be the distributor's contact details in case of query with the data provided.

This should be the distributor's name and customer number so that we can confirm the supply chain.

This should be the customer's name and address. The code certificate will list this information.

Completing the ORT Request form (2)

Product Information

Product Name*:

Product name should be Dow Corning's sales name. This is found on our sales invoices and product labels (unless relabeled yourselves upon arrival). Note that we will not be able to recognize generic names generated in your systems.

Volume (Te)*:

The volume should represent the volume of the Dow Corning product in Metric Tonnes that is expected to be exported to the EU during the validity of this certificate. This may be significantly less than the volume purchased from Dow Corning.

If you require coverage for additional products, please submit an additional form.

I have read, and agree that the Only Representative Coverage will be subject to, the [terms and conditions](#).*

Yes

Check here if you would like an e-mail copy of this request for your records.

So that we may best serve you, please complete all items marked with an asterisk (*). For an explanation on how we use this information, please see our [Privacy Statement](#).

Enter the Dow Corning product sales name which can be found on our invoices or labels

Enter the volume of the product anticipated to be exported into the EU during the validity of this certificate

There is space on one form to submit requests for up to 10 products. If you require more than 10 certificates please submit an additional form

Finally accept Dow Corning's Terms & Conditions then submit your request

Prepared for REACH

REACH - Registration, Evaluation, Authorisation of Chemicals

REACH (Registration, Evaluation and Authorisation of Chemicals), the most significant change in the European Union's (EU) chemical management history, went into effect in June 2007. While REACH is a EU regulation, it applies to materials coming into the region from around the world, making the law a global compliance matter.

The Objective

REACH aims to **better protect human health and the environment** as well as enhance the competitiveness of the chemical industry by fostering innovation. **Dow Corning supports the principle of a more effective chemicals regulatory system** in order to deliver sustainable health and environmental safety benefits.

Our Commitment

Dow Corning has pre-registered substances in its current portfolio for which it has responsibilities and obligations to do so under REACH. Dow Corning is working with raw material suppliers and downstream customers to ensure compliance. Once the initial pre-registration period ends, we will work towards registration according to the REACH implementation timeline.

For additional information regarding REACH visit the [Dow Corning REACH Resource Center](#).
