**Step 1**

The screenshot shows the ECHA website's 'Registered substances' search interface. At the top, it says 'ECHA > Information on Chemicals > Registered substances'. Below this is the 'Registered substances' title and a 'Chemical Substances Search' section. A note indicates the database was last updated on 13 June 2013 and contains 8,998 unique substances. The search form includes fields for EC/List number, CAS Number, Name, Total tonnage band (min/max), Country in which registered, and PBT Assessment outcome. It also has fields for Registration Number, Registrant (pre-filled with 'Dow Corning'), Registration type, and Submission type. A checkbox for 'I have read and I accept the legal notice' is checked. 'Search' and 'Reset' buttons are at the bottom. Two callout boxes provide instructions: one points to the 'Registrant' field with the text 'Enter “Dow Corning” in the Registrant search field', and another points to the 'Search' button with the text 'Accept the Legal Notice then click on “Search”'.
